Health Hazard:

Phthalic Anhydride is not poisonous. However, inhalation, or prolonged exposure must be avoided. Its dust irritates the mucous membrane. It is recommended to wear Safety Goggles, while handling this material. Always refer to the Material Safety Data Sheet (MSDS) for detailed information on safety.

Fire and Explosion Hazard:

Phthalic Anhydride whether molten or solid is an inflammable material and its dust and vapours can form explosive mixture, when in contact with air. It is essential to store or handle the material in a well-ventilated area away from any source of ignition.

Storage:

Phthalic Anhydride should be stored in cool, properly covered, dry area, away from direct sunlight. It should not be exposed to rain/ humidity as this leads to formation of Phthalic Acid, which is insoluble in Benzene and lowers the Melting Point.
