General advice : Remove contaminated clothing. If danger of loss of consciousness, place patient in recovery position and transport accordingly. Apply artificial respiration if necessary. First aid personnel should pay attention to their own safety.

If inhaled : Remove the affected individual to fresh air and keep the person calm. Assist in breathing if necessary. Immediate medical attention required.

If on skin : Remove contaminated clothing. Wash affected areas thoroughly with soap and water. If irritation develops, seek medical attention.

If in eye : In case of contact with the eyes, rinse immediately for at least 15 minutes with plenty of water. Immediate medical attention required.

If swallowed : Rinse mouth and then drink plenty of water. Never induce vomiting or give anything by mouth. Immediate medical attention required.

6. Accidental Release Measures

| Personal precaution           | Avoid Inhalation. Use personal protective equipment. Ensure adequate ventilation. |
| Environmental precautions     | Remove all sources of ignition. Avoid discharge into environment |
| Methods for cleaning up       | Use mechanical handling equipment. Avoid raising dust. Flush with plenty of water. Dispose of in compliance with local and national regulations. |

7. Handling and Storage

**Handling**

| General advice | Ensure thorough ventilation of stores and work areas. Take precautionary measures against static discharges. Keep away from sources of ignition - No smoking |

| Protection against fire and explosion | Avoid dust formation. Dust can form an explosive mixture with air. Prevent electrostatic charge - sources of ignition should be kept well clear - fire extinguishers should be kept handy. Electrical devices must meet the specified temperature class. |

**Storage**

| General advice | Phthalic Anhydride should be stored in cool, properly covered, dry area, away from direct sunlight. |
8. Exposure Controls / Personal Protection

Engineering Controls: Use adequate general or local exhaust ventilation to keep airborne concentrations below the permissible exposure limits.
